

## How to Upload Your Application Video to YouTube (and keep it private!)

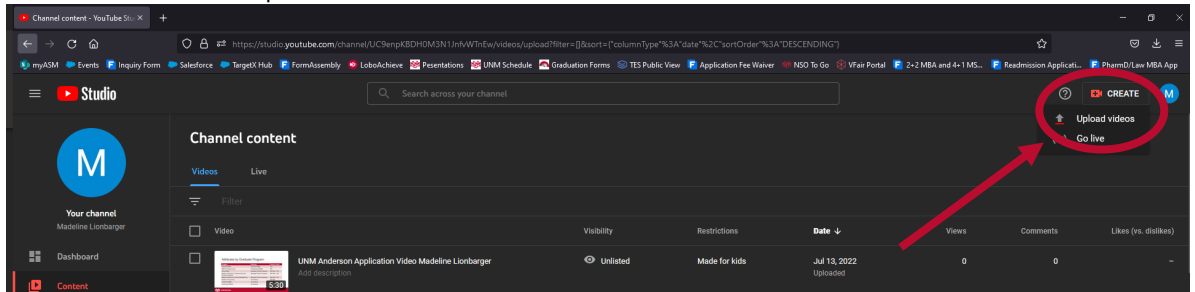

1. Record your application video on your phone, tablet, computer, or a video camera. Watch our [Application Tips](#) video for tips on recording your video.
2. Visit [youtube.com](https://www.youtube.com) and sign in with an existing Gmail or Google account, or by creating a new account.

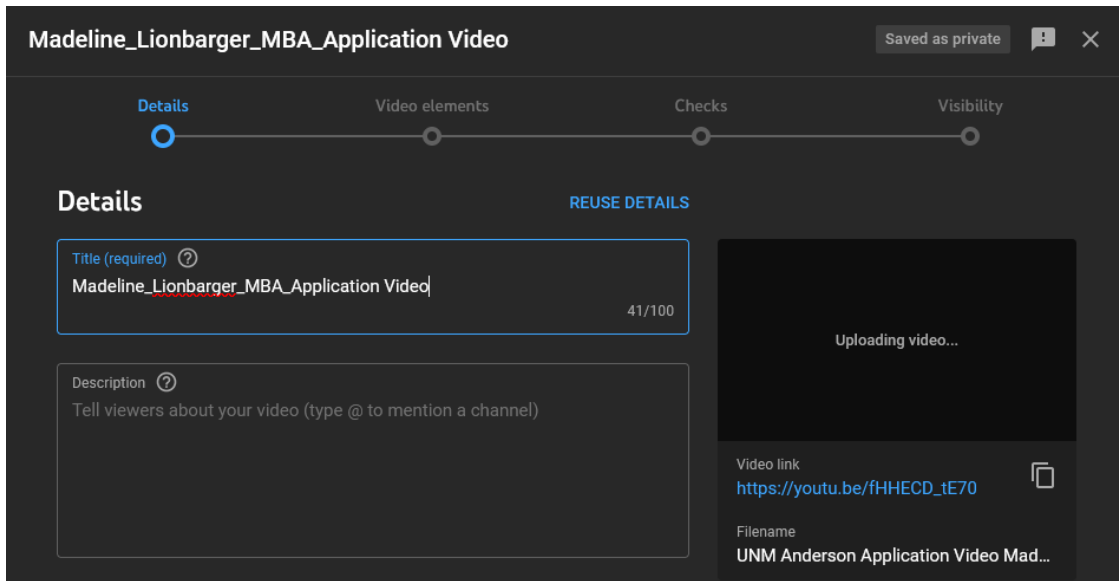

3. After signing in, go to the Your Videos Menu tab on the left-hand side of the screen. This will take you to YouTube Studio

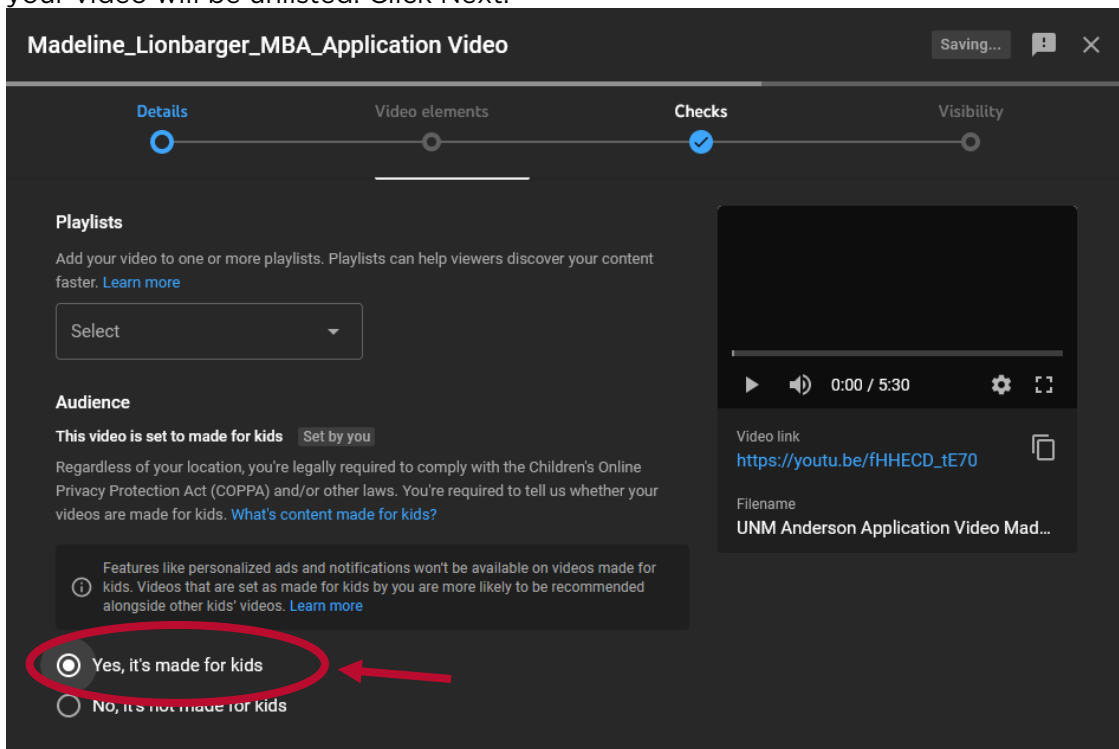

4. From YouTube Studio, click the Create button in the upper right-hand corner of the screen and select Upload Videos

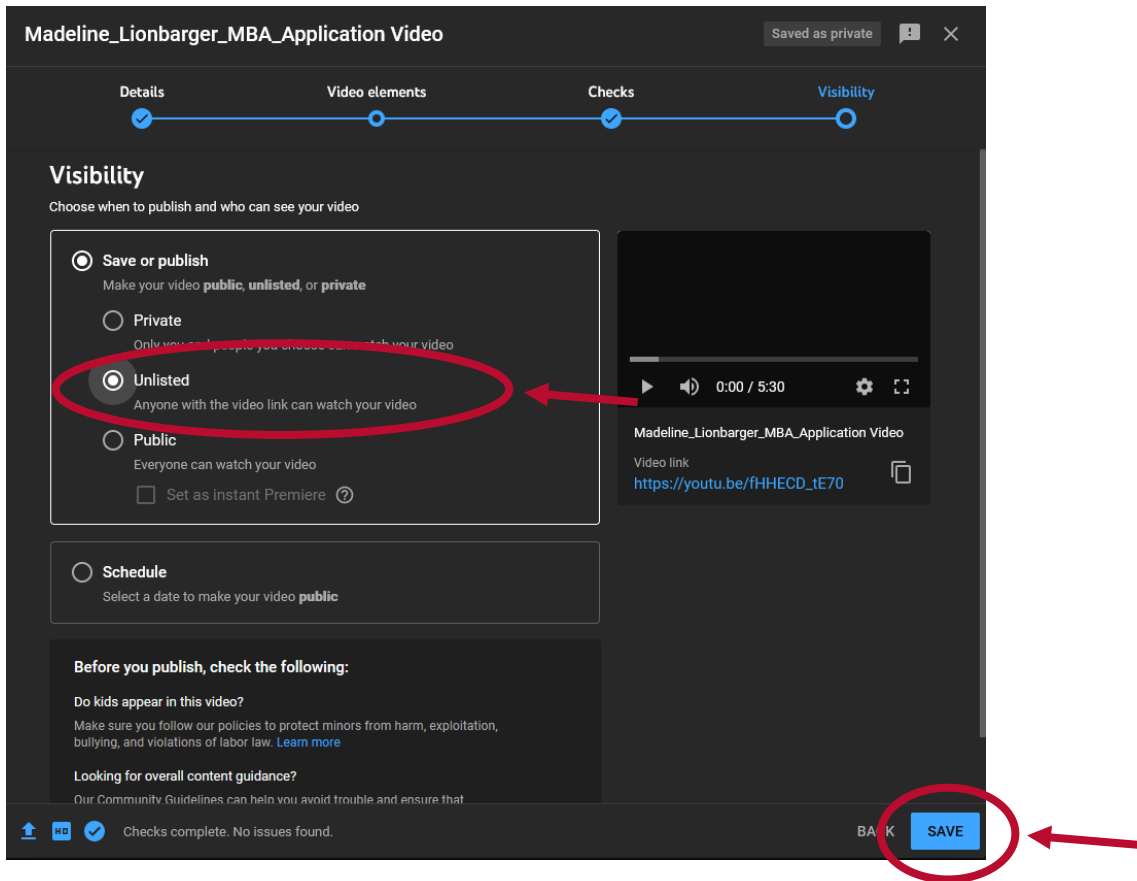

5. Select the file you want to upload by clicking and dragging or selecting a file from your computer.
6. Name your video (Suggestion: FirstName\_LastName\_Your Program\_Application Video)

7. Select your audience (Yes, it's made for kids). This selection does not matter because your video will be unlisted. Click Next.

8. Click Next on the Video Elements and Checklist sections.
9. On the Visibility section, select **Unlisted**. This will ensure that only those who have a link to your video will be able to watch your video. Click Save.

10. Copy the link, and paste in the Application Video section of the BusinessCAS application under Program Materials.
