

# UNLEASH YOUR POTENTIAL.

## Master of Science in Cybersecurity & Business Analytics

### STUDENT PERSPECTIVE

“ I found the degree interesting, as it was a blend of management and technology. After researching many universities, I came to find that UNM has one of the best business schools in the United States, with good funding, job opportunities and an engaging curriculum. ”

Suresh Kumar Appana, 2017  
Senior Product Owner  
Discover Financial Services

The Anderson Master of Science in Cybersecurity and Business Analytics is a fully online program examining issues surrounding the impact of information security and security risks to business and government. The program is application oriented with case studies and examples, building the foundation for the most widely used analytics tools and techniques. Ideal for students with undergraduate degrees in business, accounting, computer science or computer-related engineering, information systems or information technology.
